EP.VMS P1 Professional Add-on Module

Entrypass Visitor Management System (EP.VMS)

Allow business owner to enroll visitor as they enter and exit the premises. Enhanced with the latest web technologies (full web application that require Internet browser to operate), EP.VMS assist business owner to enhance the way you welcome your visitors by streamlining the process for visitor checkin.

EP.VMS dynamic architecture fulfill enterprise of any size to freely deploy the system as a standalone application, networked solution, single or multitenant facility, or single or multiple facility company. EP.VMS have the extension room to be configured to integrate with Entrypass Platform1 Access Control System (Professional Edition and above) to ensure greater security and better visitor management and tracking purposes.

EP.VMS provide business owner to start the visitor management process from the moment a visit is being planned either by the host or the visitor themselves. Host that are expecting a visit are allow to access the scheduling portal prior the visitor arrival to simplifying the registration process in the checkin counter to prevent long wait time that degrade the visiting experience also at the same time lighten the reception staff workload dramatically.
